DETAILED ACTION

The indicated allowability of claims 9-17, 29-32, 34-38, 47, 52-55, 57, 62, 63 and 67-69 is withdrawn in view of new matter recited in the claims and in of the restriction below. Claims 9-17, 29-32, 34-38, 47, 52-55, 57, 62, 63, 67-69 and 71-77 are pending from the supplemental amendment filed 2/27/2006.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 9-17, 29-32, 34-38, 47, 52-55, 57, 62, 63 and 67-69, drawn to method of treating urinary incontinence, classified in class 424, subclass 78.31.
 - II. Claims 71-77, drawn to method of treating anal incontinence, classified in class 424, subclass 78.31.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions II and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions method of treating anal incontinence and method of treating urinary incontinence. Due to the different physiological aspects of treating these two different types of incontinence, they would be considered different methods of treatment in the art. Clearly, the two methods could have very different means of treatment.

Art Unit: 1618

2. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
